

# Black and Yellow insects

Many insects are coloured black and yellow to warn other animals that they are not nice to eat, or can sting them.

**Bumblebee**

**Hoverfly**

**Plant Bug**

Two of these insects can sting. Do you know which they are?

**Beetle**

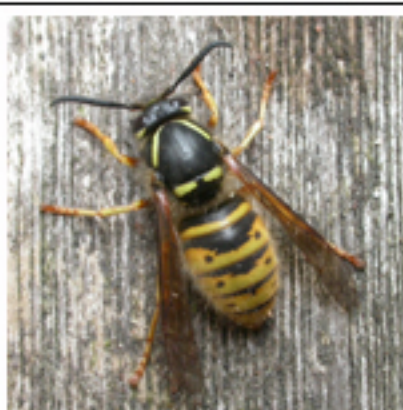

**Moth**

**Ladybird**

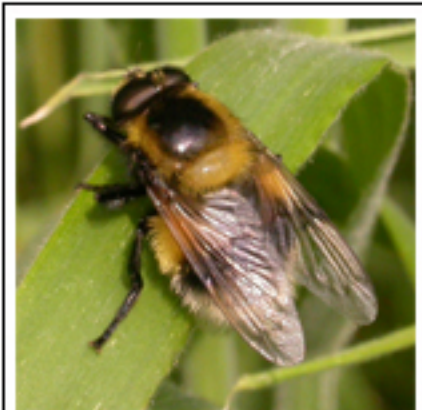

Which two of these insects are pretending to be a bee or a wasp?

**Wasp**

**Beetle**

**Hoverfly**
