1.0 Introduction to Sherwood Forest Diptera First edition 2011

This first edition of Sherwood Forest Diptera, brings together all of the NNR's historical and modern Diptera records together into a single publication for the first time. It also continues the series of invertebrate lists produced for the Sherwood Forest NNR.

Diptera represented one of the last of the large insect orders for which there had been no species list produced. Despite being a large group, Diptera are studied by relatively few naturalists, probably through the often too frequent difficulties achieving an accurate identification.

Once again our thanks goes to those who have supported the production of these invertebrate lists and for allowing records to be included.

Trevor and Dilys Pendleton, December 2010

1.2 Diptera surveys and recorders

Despite being one of the largest insect orders, the overall difficulty in Diptera identification, has meant that little recording of the many species to be found at Sherwood, has been undertaken during the past 130 years. Much of the NNR's current species list, is based upon the records of L.A. Carr in 1912 and 1914. Carr must have been prolific in his work on Diptera, with most of his records being cited in J.W. Carr's book "*The Invertebrate Fauna of Nottinghamshire*" as "Sherwood Forest near Ollerton". We presume that this area is anywhere east of the B6034 minor road, that runs from Edwinstowe towards Budby South Forest and west of the traffic island on the A614 at Ollerton. Possibly, Carr covered much of what is now Sherwood Heath, but this remains unknown at the time of writing.

Carr was joined in his efforts by two other recorders, who seem to have remained confined to the Country Park area. R.C. Bradley and C.J. Wainwright provided many records referred by to J.W. Carr as Sherwood Forest near Edwinstowe (Birklands and Bilhaugh in this list) Several species these men captured, were notable for being the first records for the UK at the time.

After the recording of Carr, Bradley and Wainwright in the late 1800's and early 1900's, virtually no Diptera recording was undertaken (at least from the information we have at our present disposal) and it was not until A. Godfrey's surveys at Sherwood Heath in 2003, 2004 and 2006, that any other records came from the NNR.

Godfrey's Sherwood Heath surveys produced many new species recorded at Sherwood for the first time, or produced the first species records since the days of Carr, Bradley and Wainwright. Similarly, his most recent survey work in the

Country Park and Buck Gates areas of the NNR, on behalf of Natural England East Midlands, yielded even more new Diptera and the reappearances of species not recorded for nearly a century.

Godfrey's work and that of the Victorian recorders, constitutes the backbone of the NNR species list in section 2.0, yet with a species count of just 587 species, it is likely that we have only just sampled Sherwood Forest's Diptera diversity.

There are certainly some surprising species yet to be encountered here, following the chance discovery of the Cranefly *Ctenophora ornata* in 2009. This is a species confined to the New Forest and Windsor Great Park and yet another example of how Sherwood is slowly developing a reputation to hold it's own, in a direct comparison to those nationally renowned sites.

1.6 Sherwood Forest NNR, Birklands and Bilhaugh SSSI and Birklands West and Ollerton Corner SSSI Maps

Due to a legal loophole, Natural England had to notify the ancient Sherwood Forest area as two separate Sites of Special Scientific Interest (SSSI) which they continue to regard as representing the whole of the Birklands and Bilhaugh (Sherwood Forest) complex. The two SSSI's are known as Birklands and

Bilhaugh and Birklands West and Ollerton Corner. We have included detailed maps of both SSSI's in this edition, which sees the inclusion of all Diptera records from both SSSI's. Records which were sourced to specific areas within either SSSI and where known, are published.

Records are included from the following sites located within the two SSSI's.

Birklands and Bilhaugh SSSI

| | |
|------------------------------|---------------------------------------|
| Sherwood Forest Country Park | (Birklands and Bilhaugh) |
| Budby South Forest | (Birklands and Bilhaugh / Budby SF) |
| Proteus Square | (Birklands and Bilhaugh / Proteus Sq) |
| Buck Gates | (Birklands and Bilhaugh / Buck Gates) |

Birklands West and Ollerton Corner SSSI

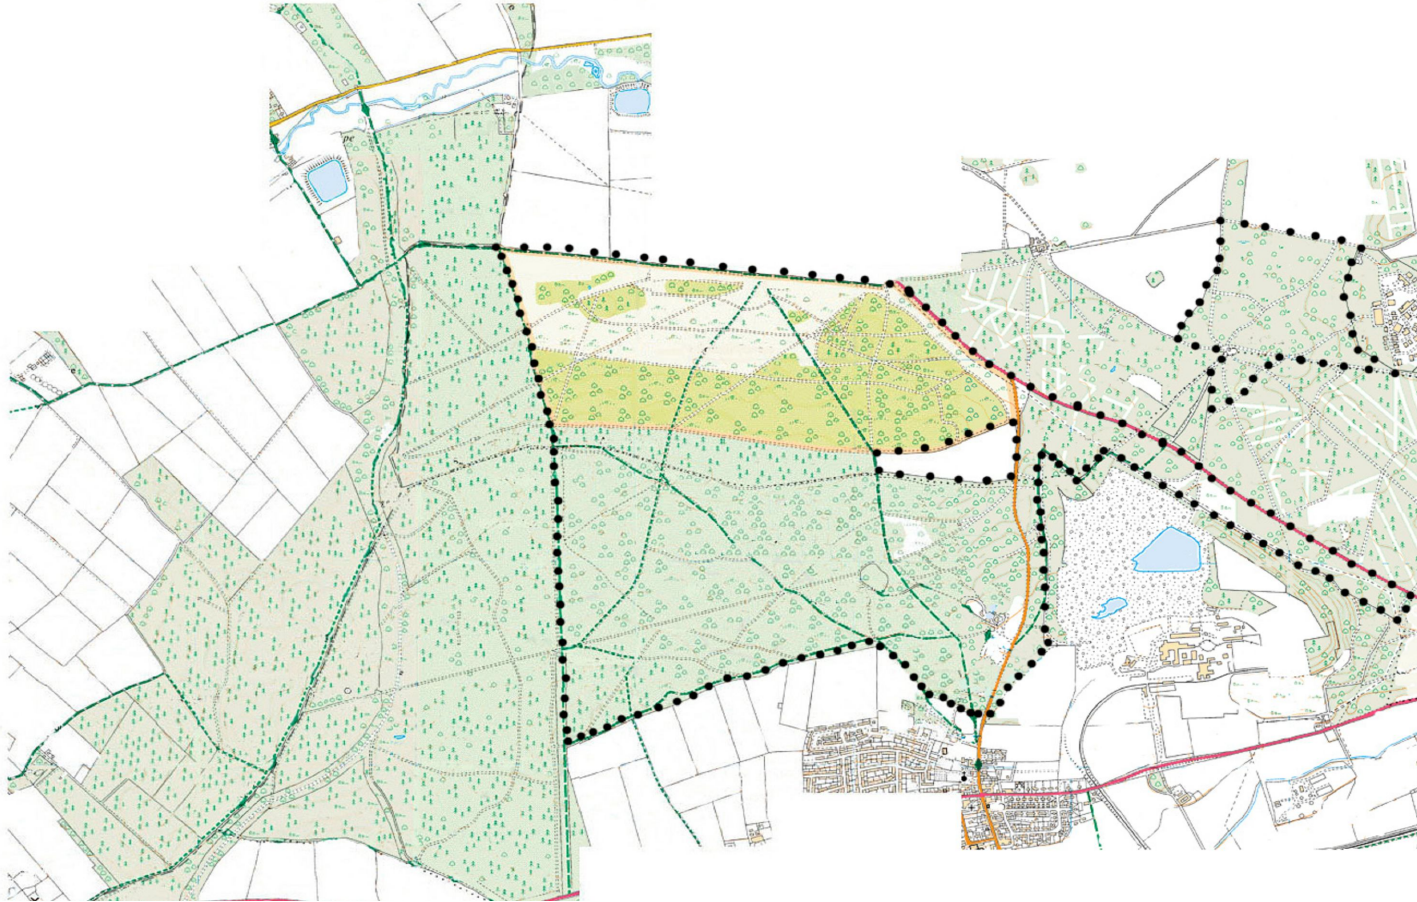

| | |
|-----------------------|--|
| Sherwood Heath | (Birklands West / Sherwood Heath) |
| Clipstone Old Quarter | (Birklands West / Clipstone Old Quarter) |

To save space in the records section, we have had to abbreviate location specific records down to individual areas of both SSSI's.

Consequently, a record from Proteus Square would be abbreviated to *Birklands and Bilhaugh / Proteus Sq*, or a record from Sherwood Heath would be abbreviated to *Birklands West / Sherwood Heath* etc. Any other records shown only as Birklands West and Ollerton Corner, are from areas away from Sherwood Heath and Clipstone Old Quarter and are largely attributable to areas situated to the west of the Country Park. At the current time, it is thought impractical to abbreviate all of the known sites within the SSSI's and this also serves to avoid the records becoming over complicated to the reader.
