

# Sherwood Forest Lepidoptera

## Historical site species list and records from the late 1800's and the early 1900's

*As recorded by J.W. Carr in "The Invertebrate Fauna of Nottinghamshire"*

**T. and D. Pendleton 2009**

All historical records sourced from J.W. Carr's "The Invertebrate Fauna of Nottinghamshire" were listed in the book as Sherwood Forest. It is presumed that many records listed as being Sherwood Forest, originated from the Birklands and Billhaugh SSSI area and were categorised as Sherwood Forest prior to publication. We have not listed any species which Carr commented as being widespread throughout the county, unless specifically stating a Sherwood Forest record, or any of Sterland's records that Carr considered to be doubtful. It should also be noted that Sterland recorded a large number of species which other recorders failed to find and many of his records could be considered doubtful by today's standards.
