

# Black and Red insects

Many insects are coloured black and red, which can be used to warn off other animals that may wish to eat them.

**Butterfly**

**Ladybird**

**Bumblebee**

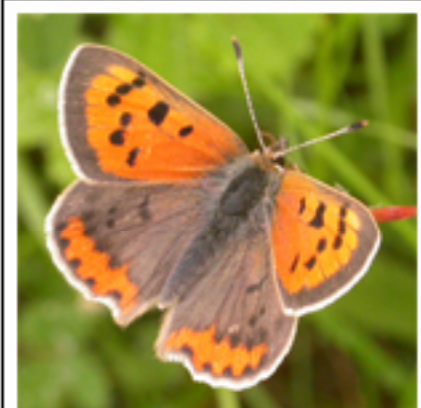

See how many of these insects you can find this Summer.

**Moth**

**Leafhopper**

**Butterfly**

Can you name any other insects or animals that are black and red?

**Crane Fly**

**Ladybird**

**Damselfly**
